

Doblo

In use

Our lightweight ramp and easy to use restraint system make using the vehicle extremely quick and hassle free with the overhead tailgate able to offer temporary protection from the elements while you are accessing the vehicle.

A fully adjustable 3 point seatbelt ensures absolute safety for the wheelchair user. For heavier chairs our optional easy to use electric winch is available.

Seating

As standard the Doblo is configured with driver and passenger seat plus wheelchair position and a single rear seat. Depending on your wheelchair size, a further single rear seat can also be fitted.

Doblo

More Value

The Doblo is available with seating configurations for either 4 or 5 people. With its smaller size it is ideally suited for couples, small families and those who just prefer to use a more compact vehicle.

Please give us a call for guidance as to seating options with your specific wheelchair.

Each Fiat Doblo comes with an impressive level of standard equipment. See below for the full specification on each trim level.

Various optional extras are available for the conversion too, including a winch to assist manual wheelchairs up the ramp
